

MA40 Mini Amplifier

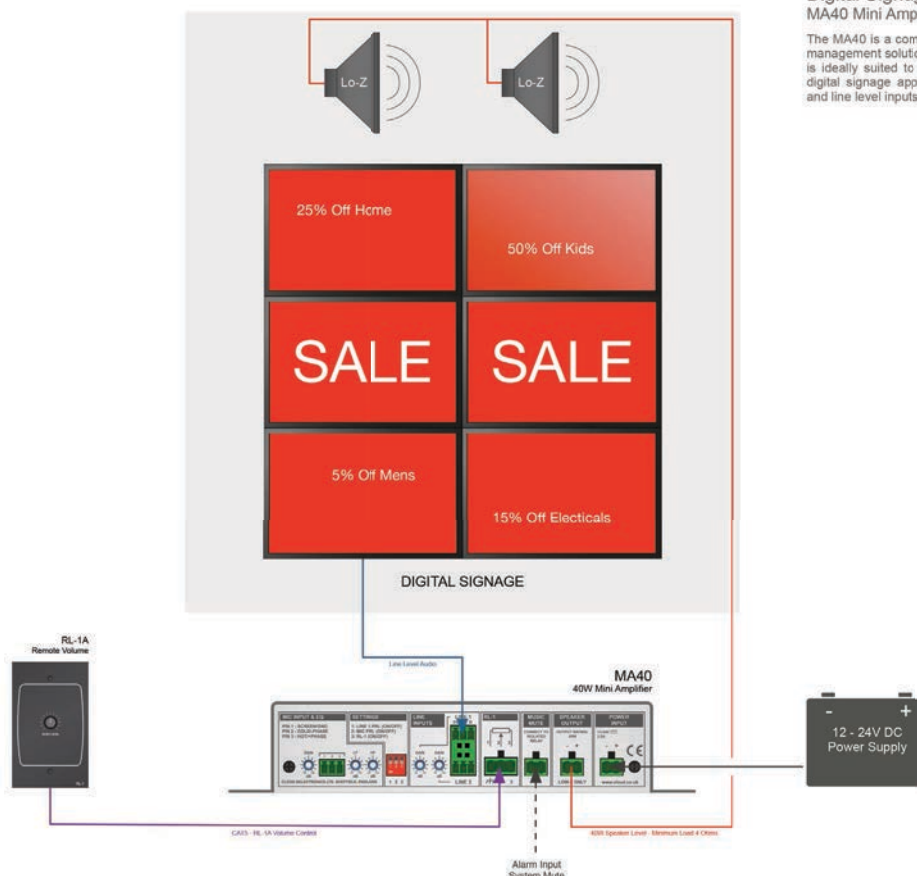

Availability: JUNE 2016

Target Price £195.00

The new MA40 Mini Amplifier from Cloud Electronics is the entry model within the new MA40 mini Amplifier Series feature packed to provide de-centralised solutions for contractors and integrators designing systems in commercial audio.

- 1 x 40W 4Ω Output (<1% THD @ Full Output)
- Microphone Input with EQ and Input Gain
- Microphone Output Level Control + Priority
- 12-24V Power Supply
- Line 1 / 2 Output Level Control + Priority
- Music EQ
- Music Mute
- Variants: EK,AUS, NA

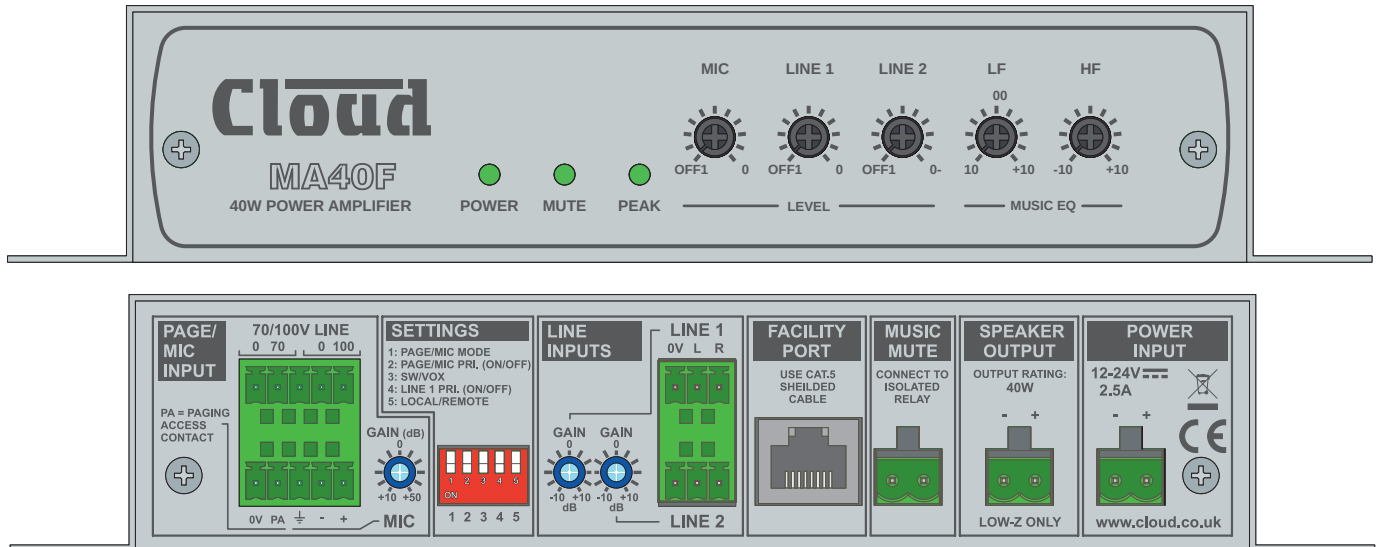

APPLICATION EXAMPLE

Digital Signage Audio MA40 Mini Amplifier

The MA40 is a complete audio amplification and management solution in a compact form factor. It is ideally suited to local audio reinforcement in digital signage applications, providing both mic and line level inputs and priority control.

MA40F Mini Amplifier

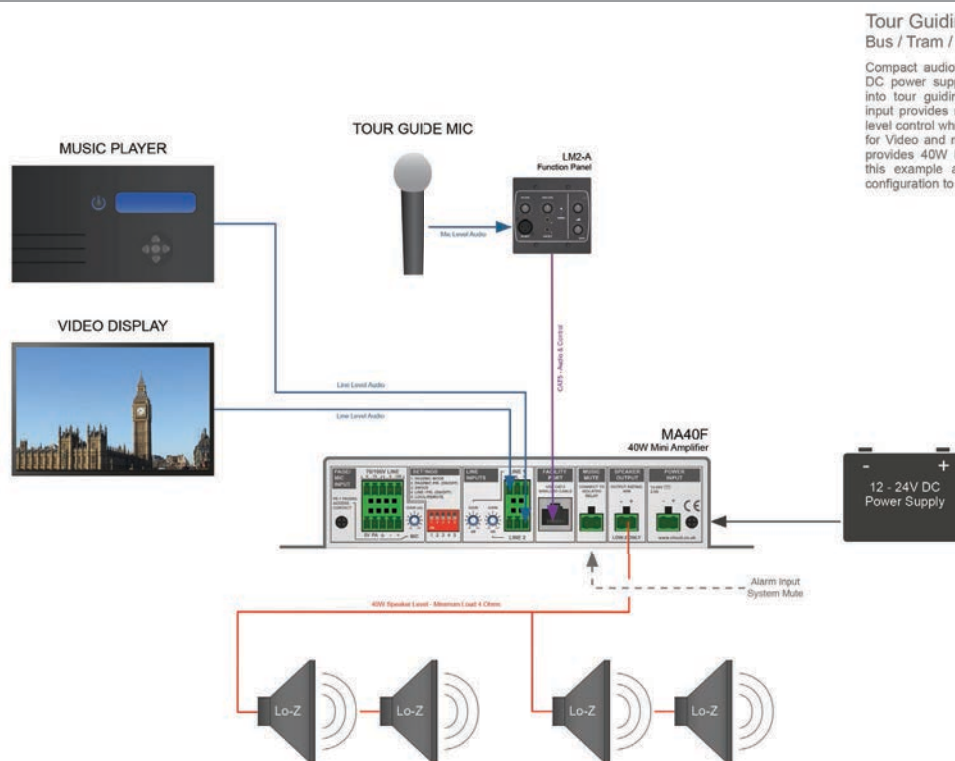

Availability: JUNE 2016

Target Price £245.00

The new MA40F Mini Amplifier from Cloud Electronics offers a useful 70V / 100V Line Input option and a paging microphone input with access contacts and a facility port (LM-2) input option. A 12V power input makes the MA40F an ideal solution for Bus / Tram / River Cruise Guide System installations in themed / visitor attractions.

- 40W 4Ω Output (<1% THD @ Full Power)
- 70 / 100V Line Input
- Paging Microphone Input Access Contacts (SW/VOX)
- 12-24V Power Supply
- 2 Line Inputs with Individual Input Gain
- Facility Port Input (For LM-2 Connection)
- Music Mute
- Variants: EK, AUS, NA

APPLICATION EXAMPLE

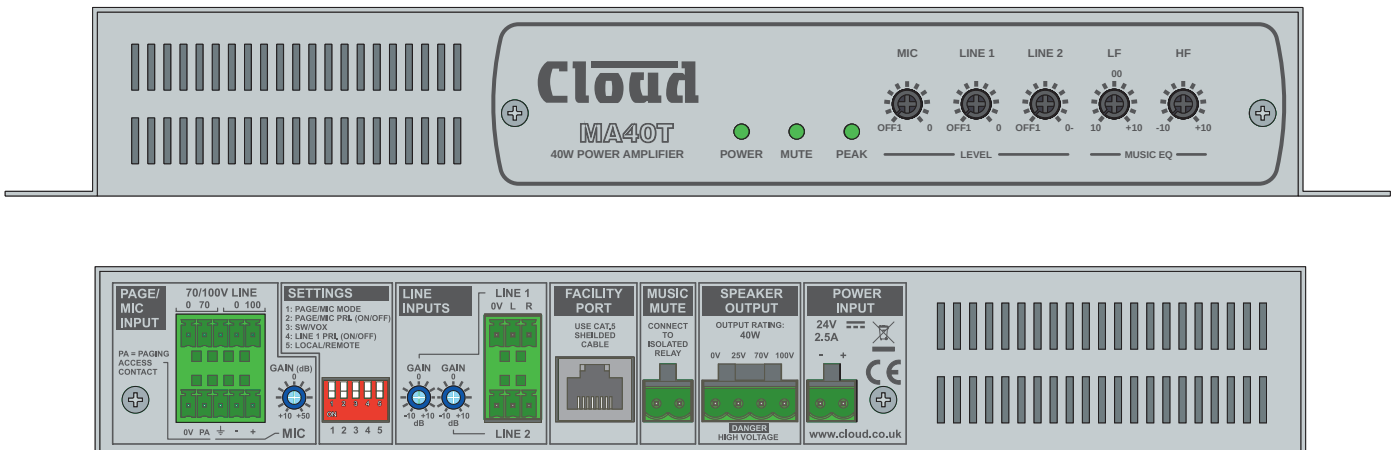

Tour Guiding System Bus / Tram / River Cruise

Compact audio system operating on a 12-24V DC power supply ideally suited for installation into tour guiding vehicles. The function panel input provides remote mic input with dedicated level control whilst the two line inputs can be used for Video and music player sources. The MA40 provides 40W Low-Z speaker output, which in this example are connected in series/parallel configuration to achieve maximum coverage.

MA40FT Mini Amplifier

Availability: JUNE 2016

Target Price £275.00

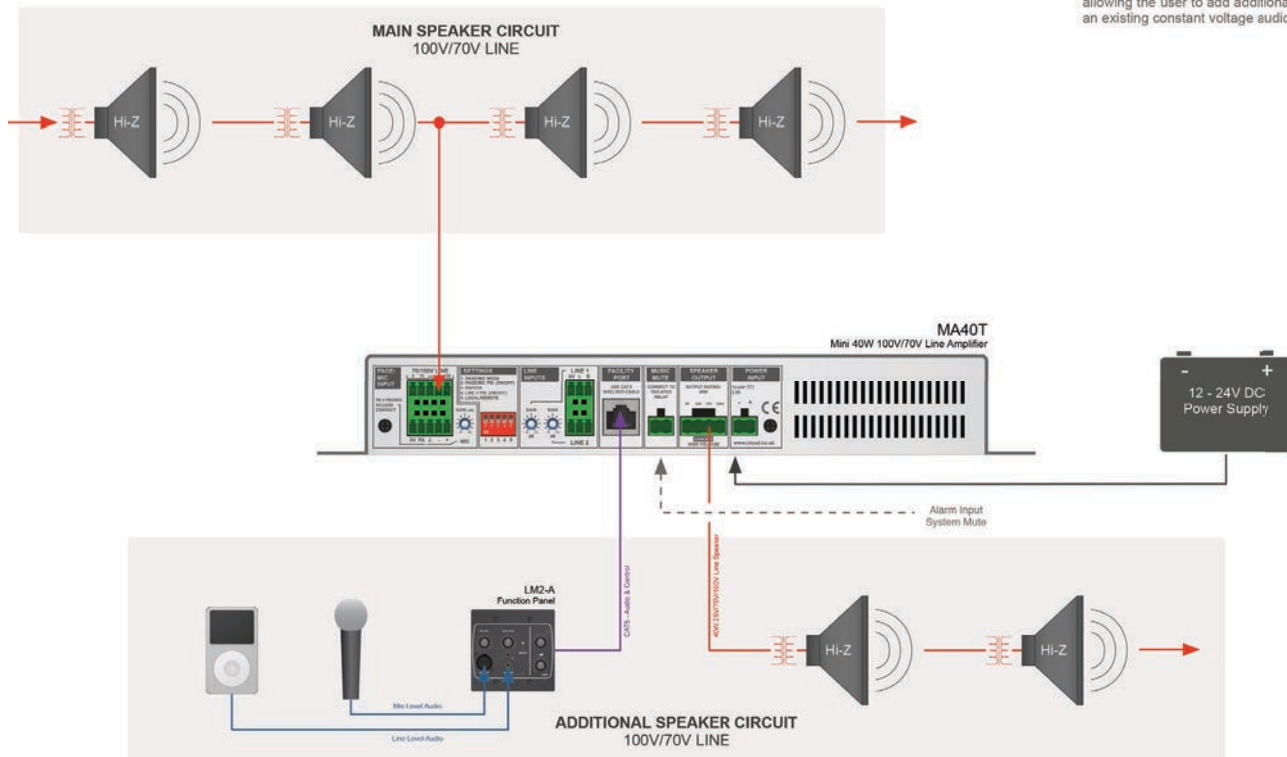

The new MA40FT Mini Amplifier from Cloud Electronics offers a 70 V / 100V Line Input Option in addition to a paging microphone input with access contacts and a facility port (LM-2) input option. The 25V / 70V / 100V Output from the MA40FT makes it ideal for adding additional zones to an existing installation.

- 40W 25 V / 70V / 100V Output
- 70 / 100V Line Input
- Paging Mic Input + Contact Access (SW/VOX)
- 12-24V Power Supply
- 2 Line Inputs with Individual Input Gain
- Facility Port Input (For LM-2 Connection)
- Music Mute
- Variants: EK, AUS, NA

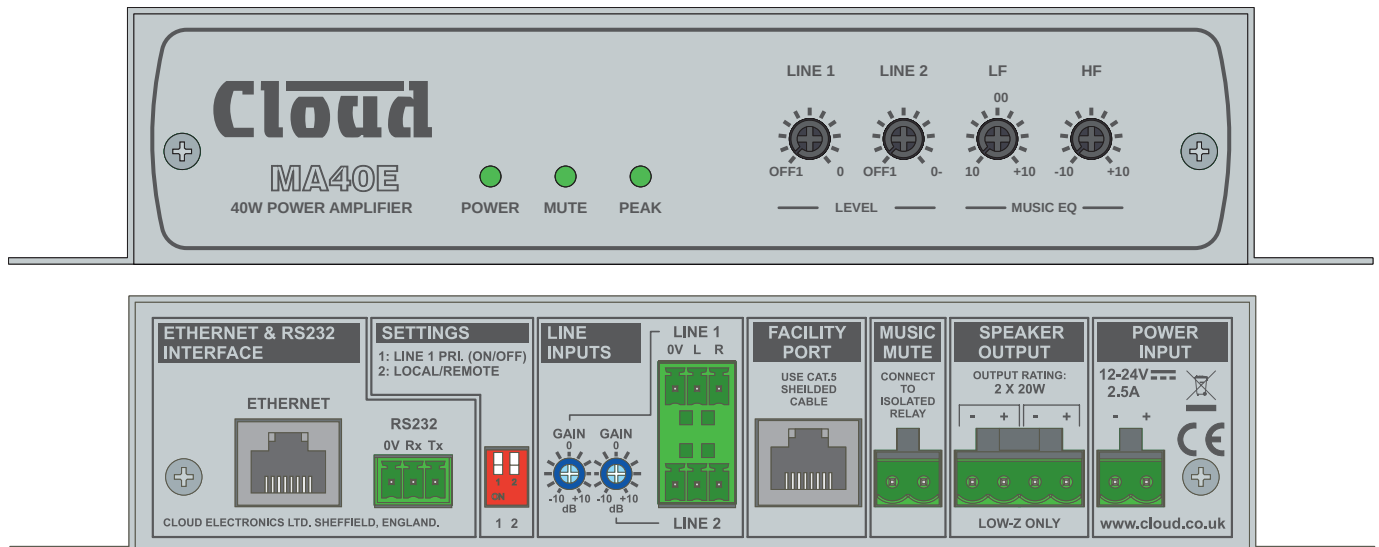

APPLICATION EXAMPLE

100V Line Extension MA40T 100V/70V Mini Amplifier

The MA40T Mini Amplifier provides 40W of amplification into 100V/70V/25V constant voltage speaker circuits. The high impedance input allows for the connection of an existing 100V/70V speaker circuit allowing the user to add additional zones to an existing constant voltage audio system.

MA40E Mini Amplifier

Availability: JUNE 2016

Target Price £295.00

The new MA40E Mini Amplifier from Cloud Electronics builds upon the features of the MA40 Amplifier providing an Ethernet / RS-232 control interface and Facility Port Input. The MA40E offers centralised control with decentralised, localised installation and input options (with the LM-2) perfect for use in themed / visitor attractions.

- 2 x 20W 4Ω Output (<1% THD @ Full Power)
- 2 Stereo Line Inputs with Individual Input Gain
- Line 1 Priority Input Option
- 12-24V Power Supply
- Ethernet / RS-232 Level / Source / EQ Control
- Facility Port Input (For LM-2 Connection)
- Music Mute
- Variants: EK, AUS, NA
