

## Paging Microphone GN-M100

The GN-M100 allows you to page messages through the intercom master stations MS-200 and CP100S. Both master stations feature a 3 pin xlr microphone input. The CP-100S input is for dynamic microphones and the MS200 input adjustable from microphone level to auxiliary level.

The paging microphone has a dynamic microphone cartridge without the need of phantom voltage feed. A 5 meter long connection cable allows remote.

An efficient pop filter with strong wire mesh, together with a rugged gooseneck, guarantees trouble free use of the paging microphone.

Function switch has three positions: Push to talk, latching, off.

### Specifications:

Type of microphone: dynamic coil

Response Characteristic: Cardioid

Frequency Response: 60 Hz to 12 kHz

Sensitivity: 3.2 mV/Pa at 1 kHz

Impedance: 600 Ohms

Gooseneck length: 310 mm

Net weight: 1.1 kgs
